
ROD SEAL NYLON BACKUP RING

Advantages:

- Good chemical resistance and abrasion resistance.
- Improve the extrusion resistance of the seal, thereby increasing the service life of the seal.

Importane Notes:

1. The seal can not be used alone, must be used in conjunction with the piston rod seal
2. When system pressure is high, PA material is recommended.
3. All the back-up rings are divided into integral and open two forms.
